| <p>NEW! Pages docker/Inspector CorelDRAW 2021 simplifies working with multipage documents thanks to the new Pages docker/inspector. It lists all pages in a design so you can easily manage them and quickly navigate a project. Each page has a scalable thumbnail preview that reflects its size and content. Reordering pages is as easy as dragging them in the docker/Inspector. What's more, you can add, delete, and rename pages in one spot, saving you time and effort. And in a click, you can switch display modes to either focus on a single page or use the new Multipage View.</p> | ✓ | | | | |
| <p>NEW! Autofit Page Another time-saver in CorelDRAW 2021 is the Autofit Page feature. In just a click, you can resize a page to fit its content. You can also quickly customize the margin by specifying the space between design elements and the edge of the page.</p> | ✓ | | | | |
| <p>ENHANCED! Guidelines When working with guidelines, you can quickly switch views from world scale to page dimensions. In addition, it's easier to manage custom guidelines, so you can set up the framework for a design faster than ever.</p> | ✓ | | | | |
| <p>NEW! Snap to self When working in complex designs, a new setting allows you to prevent objects from snapping to their own snap points so you can move and transform design elements with ease and precision.</p> | ✓ | | | | |
| <p>Object distribution Improving on the Align and Distribute docker/Inspector, it's now easier than ever to get the exact page layouts and precise designs in CorelDRAW. The Distribute by Spacing option simplifies defining a specific dimension between objects when distributing them.</p> | ✓ | ✓ | (✓) | (✓) | (✓) |
| <p>Fit Objects to a Path Fit any type and number of objects to a path of your choice. Smart spacing and rotation settings help you customize the arrangement of objects along the path.</p> | ✓ | ✓ | ✓ | ✓ | |
| <p>Straighten photos interactively Rotate crooked images by interactively aligning a straightening bar to an element in the photo or specifying an angle of rotation. All controls are easily accessible on screen or on the property bar for perfect results in minutes.</p> | ✓ | ✓ | ✓ | ✓ | |
| <p>Add Perspective effect Quickly create the illusion of distance and depth by applying perspective to bitmaps, vector objects or both directly in the drawing window. It's an ingenious tool to showcase artwork in real world scenarios.</p> | ✓ | ✓ | ✓ | ✓ | |

Layout Tools

Apply envelopes to bitmaps

Shape a bitmap interactively by placing it in an envelope and dragging its nodes. Quickly and seamlessly blend a bitmap into an illustration by using envelope presets or crafting a custom envelope from scratch.

Master Layers

Master Layers make it easier to create page-specific designs for your multi-page documents.

Page number

Easily add page numbers—alphabetic, numeric, or roman—on all pages of a document, starting on a specific page, or starting at a particular number.

Tables

Create and import tables to provide structured layouts for text and graphics.

Drawing Tools

NEW! Perspective Drawing

In CoreDRAW® 2021, it's easier than ever to draw objects or scenes in perspective. This new feature is based on the principles of perspective projection and boosts productivity by eliminating the need to first set up complex grids. To get you started, there are presets for four types of perspective drawing, which are easily customizable by adjusting any part of the perspective field. The possibilities are limitless thanks to the ability to create multiple perspective groups each with their own unique perspective field within the same page or document.

Art Style effects

Art Style effects use artificial intelligence to modify an image or object to produce a stylized version while preserving the original content. You can choose from a range of AI presets based on the techniques of different artists or genres.

Vector feathering

The Feather effect gradually increases the transparency in the edges of vector and bitmap objects to make them blend seamlessly into a design. You can customize the effect by specifying the width of the feathering and transparency of the gradient.

Inner Shadow tool

With CoreDRAW, you can apply inner shadows to design elements to give them 3D depth. The new Inner Shadow tool lets you simulate light falling on an object in a click and then fine-tune the inner shadow with intuitive property bar controls.

Bitmap effects lens

Using AI technology, CoreDRAW lets you apply bitmap effects as lenses. Moving or manipulating the lens gives you the freedom to position the bitmap effect with precision in your design. Bitmap effects can also be applied as lenses in Coel PHOTO-PAINT™.

PowerTRACE™

AI-assisted features in PowerTRACE 2021 and 2020 deliver the best bitmap-to-vector trace results yet. You can now take advantage of cutting-edge image-optimization options that help improve the quality of a bitmap as you trace it.

Non-Destructive effects

Apply, modify, and experiment with bitmap effects on both vectors and bitmaps, all without altering the source image or object in CoreDRAW.

Drawing Tools

Symmetry mode

Create a range of symmetrical designs, from simple objects to complex kaleidoscopic effects in real time, and boost your productivity by automating what is usually a very time-consuming workflow.

Block Shadow tool

Add solid vector shadows to objects and text with this interactive feature that reduces the time getting a file ready for output. It accelerates reprographic workflows by greatly reducing the number of lines and nodes in shadows.

Pointillizer™

Generate high-quality vector mosaics from any number of selected vector or bitmap objects with just a few clicks. Inspired by the Pointillism painting technique, it's great for creating vehicle wraps, window decor projects, and more.

Impact tool

Give your designs a little more spark! It's perfect for effortlessly adding movement or focus to an element in a drawing. Effects are non-destructive, highly customizable vector objects that can be edited with other tools.

Align and distribute nodes

Align and distribute nodes using the bounding box of a selection, the page edge or center, the closest grid line, or a specified point. Distributing nodes is just as easy, adding equal spacing between them horizontally or vertically.

Straighten photos interactively

Rotate crooked images by interactively aligning a straightening bar to an element in the photo or specifying an angle of rotation. All controls are easily accessible on screen or on the property bar for perfect results in minutes.

LiveSketch™ tool

Sketch and design on the fly! LiveSketch is a revolutionary drawing tool based on the latest developments in Artificial Intelligence and Machine Learning. Free-form sketching converts into precise vector curves.

NEW IN 2017

Vector and bitmap pattern fills

Preview, apply, and interactively transform both vector pattern and bitmap pattern fills using enhanced controls in the Object Properties docker/Inspector. You can also save fills you've created or modified using the new .FILL format.

Fountain fills

Create elliptical and rectangular fountain fills, apply transparency to individual fill color nodes, repeat a fill within a filled object, adjust a fill's angle of rotation and smooth the blend transition of a fountain fill.

Support for Real-Time Stylus (RTS)

You can take full advantage of the pressure and tilt of your RTS-compatible pen, tablet or device to control your brushstrokes in CoreIDRAW and Corel PHOTO-PAINT.

Hide and display objects

CoreIDRAW allows you to hide objects and groups of objects, helping you edit objects in complex projects and experiment with your designs more easily.

Drawing Tools

Mesh Fill

Design multi-colored filled objects with more fluid color transitions. Reveal objects behind individual nodes with a transparency option.

Smoothing vector objects

Remove jagged edges and reduce nodes in curve objects with the Smooth tool.

Image Editing

NEW! HEIF Support

CorelDRAW Graphics Suite 2021 lets you take advantage of photos captured on mobile phones with High Efficiency Image File (HEIF) support. Many devices use HEIF as the default capture format because it delivers smaller file sizes without sacrificing picture quality. You can import or open the key image from HEIF files in Corel PHOTO-PAINT or import it into a drawing in CorelDRAW.

NEW! Image Adjustment

Corel PHOTO-PAINT 2021 introduces a range of features and enhancements to deliver more efficient, accurate image editing. The new Adjustments docker/Inspector gives instant access to the most critical and frequently used filters, letting you quickly work non-destructively, in real-time, and in context. What's more, the brand new Local Adjustment Mode simplifies targeting a filter to a specific image area.

ENHANCED! Replace colors

The Replace Colors filter has been rebuilt from the ground up. Improved color pickers and eyedropper tools allow for more precise editing, and a new interactive control makes fine-tuning hue and saturation ranges more intuitive. CorelDRAW 2021 has also added a slider to help ensure smoother color transitions between selected and unselected pixels.

Upsampling options

AI-powered upsampling options help enlarge images without losing detail, as well as deliver better image upscaling and enhanced bitmap tracing. Using machine-learned models, these additions preserve clean edges, sharpness, and fine details in upscaled files.

JPEG artifact removal

You can get the most out of older images with advanced machine-learning techniques that remove compression artifacts and recover color details, eliminating tedious manual editing. What's more, these techniques can deliver noticeably better trace results.

Non-destructive effects in Corel PHOTO-PAINT

The Effects docker/Inspector in Corel PHOTO-PAINT makes it easy to apply, modify and experiment with effects, all without altering the source object. Get different looks by adding multiple effects, reordering them in the list or toggling them on or off.

Smart Selection mask tool

The Smart Selection Mask tool in Corel PHOTO-PAINT selects image areas using an algorithm that intelligently expands the selection by finding edges. What's more, the Mask Transform tool is enhanced so that transformations can now be applied to pixels within a mask.

PhotoCocktail™

Create stunning photo collages. Start with a photo or vector object as the foundation of your mosaic, then choose a library of bitmap images as the mosaic tiles, and let PhotoCocktail do the rest.

Image Editing

Adjust photo perspective interactively

Use the interactive Perspective Correction tool to adjust the perspective of buildings, landmarks, or objects in photos. Simply line up the four corner points with a shape that should be rectangular to adjust the entire shot.

AfterShot 3 HDR™

Download AfterShot 3 HDR from within CorelDRAW and Corel PHOTO-PAINT, to make professional-grade corrections and enhancements to RAW or JPEG photos.

HDR Merge

Create high dynamic range (HDR) images with the HDR module included in AfterShot 3 HDR.

Liquid tools

In Corel PHOTO-PAINT, four pressure-sensitive Liquid tools—Smear, Attract, Repel, and Twirl—offer fresh creative options for retouching photos.

Unsharp Mask Lens

Sharpen photos by increasing the contrast of adjacent pixels while preserving both high- and low-frequency details, such as edges and large structures.

Special effects

Corel PHOTO-PAINT provides a range of camera effects, including Bokeh blur, Colorize, Sepia Toning, and Time Machine.

Planar Mask tool

Use the Planar Mask tool in Corel PHOTO-PAINT to define a feathered editable area along parallel lines. When combined with a blur effect, you can simulate depth of field, giving focus to a particular object while blurring areas outside the planar mask.

Smart Carver™

Easily remove unwanted areas from a photo and simultaneously adjust the photo's aspect ratio.

Pass Through Merge Mode

Achieve greater control when applying a lens or effect to a group of objects.

Tone curve adjustments

Adjust image tone with accuracy and precision.

Collaboration

NEW! Live Comments

This new feature lets everyone involved in a project work in real-time, where stakeholders can comment on and annotate a document in CorelDRAW.app™ with all feedback instantly appearing in the working file in CorelDRAW 2021.

Feature

CoreDRAW® Graphics Suite 2021 CoreDRAW® Graphics Suite 2020 CoreDRAW® Graphics Suite 2019 CoreDRAW® Graphics Suite 2018 CoreDRAW® Graphics Suite 2017 & X8

Collaboration

NEW! Project Dashboard

A project dashboard helps you store, view, organize, and share files saved to the Cloud. A new dashboard in both CoreDRAW 2021 and CoreDRAW.app acts as your collaboration hub. It contains all your Cloud drawings and in a click displays a preview, the number of comments and team members, and project status. The dashboard also lets you share designs directly from CoreDRAW 2021 without having to open each file.*

Comments docker/inspector

The Comments docker/Inspector in CoreDRAW acts as your collaboration hub, where you can view, respond to, and resolve feedback, as well as add annotations and notes of your own. This also means no more marked-up PDFs or image files, saving you time and screen space.

Collaboration workflow*

A new workflow makes collaborating with colleagues and clients easier than ever. Using collaboration features in CoreDRAW in tandem with CoreDRAW.app and Corel Cloud, teams can easily review designs, and feedback can be implemented faster.

Collaboration sign-in options*

When you're reviewing a drawing in CoreDRAW, you can sign in using your Google Workspace or Microsoft 365 accounts, which authenticates your comments. Alternatively, you can just sign in as a guest and have feedback linked to the username that you choose.

Design Workflow

NEW! Multipage View

CoreDRAW 2021 helps accelerate the design workflow with Multipage View. It lets you see all pages in a document simultaneously, so you don't have to click tabs to navigate to another part of your drawing. View, manage, and edit all of your project's digital assets in one view.

ENHANCED! Find and Replace

Finding and replacing objects is easier in CoreDRAW 2021 thanks to new indicators that highlight objects included in a search when you've limited the range to selected items.

Find and Replace

The redesigned Find and Replace docker/Inspector in CoreDRAW offers an expanded search range so you don't have to do multiple sweeps in the same file. There are also powerful time-saving options for simultaneously finding and replacing the color or color model of an outline or fill, including mesh fills.

Project Timer

Keep organized, bill clients, and gain time management insight with an accurate, non-intrusive way to track project time. Appearing as a discreet toolbar above the drawing window, the Project Timer is fully customizable to match your workflow.

Microsoft Surface Dial support

Get enhanced support for wheel devices, such as the Microsoft Surface Dial. Experience an alternative and more intuitive way of working in CoreDRAW by using touch and dial alone. Put your keyboard aside and try the contextual onscreen UI.

Color Styles docker/inspector

View, arrange and edit color styles and color harmonies using the enhanced Color Styles docker/Inspector. Add the colors used in a document as color styles, which makes it easier than ever before to implement a color change throughout a project.

*Note: Collaboration features are available exclusively with a CoreDRAW Graphics Suite subscription, licensing with maintenance, or an additional purchase plan for perpetual license customers.

Design Workflow

Context-sensitive Object Properties docker/inspector

The redesigned Object Properties docker/Inspector has a new tab option that presents only one group of formatting controls at a time, making it easier to focus on the task at hand. Fine-tune your designs with object-dependent formatting options.

Styles engine and docker/inspector

Easily create outline, fill, character, and paragraph styles and Style Sets, which are groups of styles that you can later edit once and have the changes applied instantly throughout a project.

Color management

Set application color policies to achieve the most accurate color representation with the Default Color Management Settings dialog, which gives greater control to advanced users.

PANTONE spot color palettes

Get support for the latest spot color palettes, plus new palettes from PANTONE.

Alignment and Dynamic Guides

View, set up and modify alignment guides. Use the Intelligent Spacing guides to position objects with the same spacing as nearby objects, and the Intelligent Dimensioning guides scale or rotate an object in relation to nearby objects.

Complementary colors and Harmonies

Snap all colors in a color harmony to a rule-based system to modify them while preserving their harmony, and group a document's color style to easily produce iterative designs with varying color schemes.

Windows Color System Support

Easily match colors between Corel and Microsoft applications.

Adobe Color Management Module

Easily match colors between Corel and Adobe applications.

Document color palettes

Automatically generate a custom color palette on the fly for each design project. You gain quick access to this project's colors in the future.

QR codes

Create unique QR codes that include text, images and colors.

Built-in RAW camera support

Import and adjust RAW camera files directly from your digital camera (with support for over hundreds of cameras), and preview changes in real time.

Design Workflow

PDF/A support

Preserve files for future use with the PDF/A file format, an ISO standard for electronic archiving.

Adobe product support

Ensure a seamless workflow across Corel and Adobe applications with support for Adobe Photoshop, Adobe Illustrator, PDF/A, and Acrobat.

Microsoft product support

Enjoy support for support for Microsoft Publisher, as well as Microsoft Word and Microsoft Visio.

AutoCAD DWG/DXF support

Work with the latest file format support for standard CAD file (exchange) formats.

Typography

NEW! Export or import font collections

Corel Font Manager 2021 offers a new feature that helps ensure that you can preserve your font collections. You can now import and export font databases so that you can use them in another version of the software or share them with others.

Enhanced! Symbols docker/inspector

An enhanced Symbols workflow saves you time by enabling you to quickly search for symbols within large libraries and identify them easier among other objects.

Variable Fonts support

With CorelDRAW Graphics Suite 2021 and 2020, you can take advantage of the flexibility of OpenType variable fonts, which let you interactively fine-tune a font's appearance. A single variable font file offers a range of looks that used to require multiple fonts, which can reduce file size.

Font list box

With the Font list box in CorelDRAW and Corel PHOTO-PAINT, you can view, filter, and find fonts easily.

Numbered lists and Bulleted lists

CorelDRAW support for customizable multilevel bulleted and numbered lists in paragraph text. The ability to include sublevels in both bulleted and numbered lists ensures that you can clearly convey information in your drawings and layouts.

Corel® Font Manager

Organize and manage your font library with the intuitive Corel Font Manager and user your favorite fonts without installing them, and work faster with fonts using the network storage feature.

Special characters, symbols, and glyphs

The revamped Insert Character docker/Inspector presents all characters, symbols and glyphs associated with a selected font, making it easier than ever to find these items and then insert them into your documents.

Font embedding

Embed fonts when you save CorelDRAW documents so that recipients can view, print, and edit the document exactly as designed.

Typography

Advanced OpenType support

Take greater advantage of advanced OpenType typography features, such as contextual and stylistic alternates, fractions, ligatures, ordinals, ornaments, small caps, swashes, and more.

Complex script support

Ensure proper typesetting for glyphs used by Asian and Middle Eastern languages.

Printing & Publishing

NEW! Multi-asset export

Export a list of pages and objects to a range of formats in a single click. CoreDRAW 2021 lets you create a customized list of assets to export with one click. The new Export docker/Inspector has a range of flexible, time-saving options for outputting pages and objects.

PDF support

It's easier to fine-tune PDFs in CoreDRAW before you export them thanks to a warning that helps pinpoint and troubleshoot issues. There's also a new setting that reduces the size of the PDF by cropping anything that isn't on the drawing page.

Print Merge

The revamped Print Merge feature makes it easy to combine a graphic with a data source for personalized mass mailings, business cards, certificates, and more.

PDF/X support

Output files that are compatible with any device and compliant with print-industry standards using ISO-compliant PDF/X export options and support for PDF/X-4.

incl. PDF/X-4

incl. PDF/X-4

incl. PDF/X-4

(up to PDF/X-3)

(up to PDF/X-3)

Prep & Stretch docker/inspector

The Prep and Stretch docker/Inspector in Corel PHOTO-PAINt lets you prepare your photos and images for canvas printing in three easy steps achieve the perfect composition for your wall art.

Border and Grommet for banner printing

With the Border and Grommet dialog box in CoreDRAW, you can add borders and grommet markers to prepare banners for printing.

Preflight Control

Perform a quality check before printing, exporting or publishing your file to PDF. Preflight Control identifies issues and potential problems, and provides suggestions for resolving them.

On-screen color proof

Reliably preview how your artwork and colors will appear on different output devices or in other applications where you need to post your artwork.

Web

CoreDRAW.app

Use CoreDRAW.app, the online vector illustration and graphic design web-app to gather feedback from a client, or to access your work remotely when you're not near your computer.

Publish to WordPress

Send your work directly to a WordPress media library from within the application. This new functionality lets you convert selected objects or an entire project to a JPEG, GIF, or PNG file and then upload to a WordPress account.

Design in pixels

View and create drawings in actual pixel units with the Pixel Preview mode, which gives you a more accurate representation of how your design will appear on the Web.

Pixel-perfect workflow

CoreDRAW takes the guesswork out of creating clean, crisp images for the web with several features that ensure pixel-perfect precision.

Accessing Design Assets

Digital asset management

Take advantage of redesigned UI to work more easily with images, fills, fonts, and more. Plus, use the Content docker/Inspector to quickly find vector and raster images.

Default folder location

Find and share design assets with ease! You choose where to store content rather than use the default folders.

Blank Document/Image presets

Choose from a range of preset destinations, document sizes and color settings with the Create New Document/Image dialog box.

Improved Template workflow

The template workflow helps boost your productivity. Download new templates, add your own library, migrate a collection anywhere, and more — all within the suite.

High-quality Thumbnail previews

Easily find and organize CoreDRAW and Corel PHOTO-PAINT files.

User Interface

ENHANCED! Pan and Zoom

CoreDRAW Graphics Suite 2021 is optimized to better leverage your system's graphics processing unit (GPU) and deliver significantly smoother panning and zooming. Whether you're using a mouse or trackpad, you can navigate a document with perfect fluidity.

User Interface

Redesigned Dialog box UI

In response to user feedback, dialog boxes have been made more consistent throughout the suite. Frequently used settings and controls are easier to find, so you can locate them instantly and work faster.

Options navigation

It's quicker and easier than ever to tailor your design environment to best suit the way you work. In just a click, you can switch between options for the entire suite, the active application, or the current document, as well as settings for the default behavior of commonly used tools.

Objects docker/inspector

The Objects docker/Inspector gives you direct control over the structure of a document and fast access to its components, helping you work faster and smarter.

Touch-friendly user interface

Tablet Mode support helps you sketch on the fly and make quick adjustments using touch or a stylus. Plus, the new Touch workspace streamlines the UI to maximize the size of your drawing window by displaying only the tools and commands you're most likely to use.

Microsoft Surface support

CoreDRAW Graphics Suite offers native Microsoft Surface Dial support on Windows 10. Use the CoreDRAW and Corel PHOTO-PAINT applications in the suite, to experience one of the most unique ways to create and interact with technology.

Welcome Screen

The Welcome Screen appears when you start the application. With the Welcome Screen, you can quickly start or open a document, choose a workspace that suits your needs, access online learning videos and other learning resources, and get inspired by a gallery of original artwork created with CoreDRAW. Plus, discovery files can help you get started quickly with the application.

Workspaces

Choose from a variety of workspaces designed for different proficiency levels and specific tasks: Page Layout and Illustration, a Classic option for longtime users, a Lite option for new users, and workspaces with the look and feel of Adobe Photoshop and Adobe Illustrator.

Support for UltraHD 4K displays

An updated interface and support for 4K displays let you comfortably view the applications on even UltraHD (ultra high definition) monitors.

Fully scalable and customizable UI

You can adapt your design space to your needs with the updated and fully customizable interface. Newly designed icons allow scaling up to 250%. You can lighten or darken the application background by choosing a theme.

Undocking documents

Drag a document outside of the application window to undock it when working with multiple documents.

Performance

New! Apple Silicon Support (For Mac)

Performance

New! Customizable keyboard shortcuts (For Mac)

Adapt your keyboard shortcuts to match your workflow needs. Accelerate productivity with the ability to assign custom shortcut keys to your most frequently used tools and commands

ENHANCED! Display performance

CoreDRAW Graphics Suite 2021 on Windows is optimized to fully leverage your system's graphics processing unit (GPU) and deliver significantly smoother panning and zooming. Whether you're using a mouse or trackpad, you can navigate even the most complex layouts with perfect fluidity.

PowerClip objects

Performance enhancements in CoreDRAW help you work faster with drawings that contain lots of PowerClip objects. You'll notice quicker display and smoother editing of the most complex designs.

Perspective and Radial Blur effects

In both CoreDRAW and Corel PHOTO-PAINT, the Radial Blur and Perspective effect are smoother and more responsive.

Brush performance and color replacement

Corel PHOTO-PAINT is optimized to deliver improved brush behavior. Tools like the Brush, Healing Clone and the Eraser are much more fluid, especially when using larger nib sizes. Additionally, Corel PHOTO-PAINT makes selecting and replacing colors in images faster and more accurate.

ACCELERATED! Startup time

The first thing that you'll notice in CoreDRAW Graphics Suite 2021 and 2020 is the quicker startup. You'll also see improved speed when opening, closing, saving, printing and exporting even the most complex documents.

Vector previews

Boost productivity with a faster rendering of tool previews, curve previews, nodes, and handles, effect controls and sliders, and text.

GPU accelerated vector preview

Reposition and edit complex vector shapes without taxing your system's resources. Choosing to use the GPU may deliver faster rendering of tool previews, curves and other effects in CoreDRAW and Corel PHOTO-PAINT on some machines.

Multi-core support

Complete your tasks faster with powerful performance enhancements that leverage multi-core processing to maximize your computer's power.
